OPENAI DEVDAY HACKATHON · PARIS

Your ADHD brain isn't lazy.

It just needs a starter. Meet Nox, the desktop buddy that helps you start, stay focused, and pick up where you left off.

THE PROBLEM

ADHD isn't about knowing what to do. It's about doing it.

1 **Starting**
The blank page. Ten tabs opened, then closed.

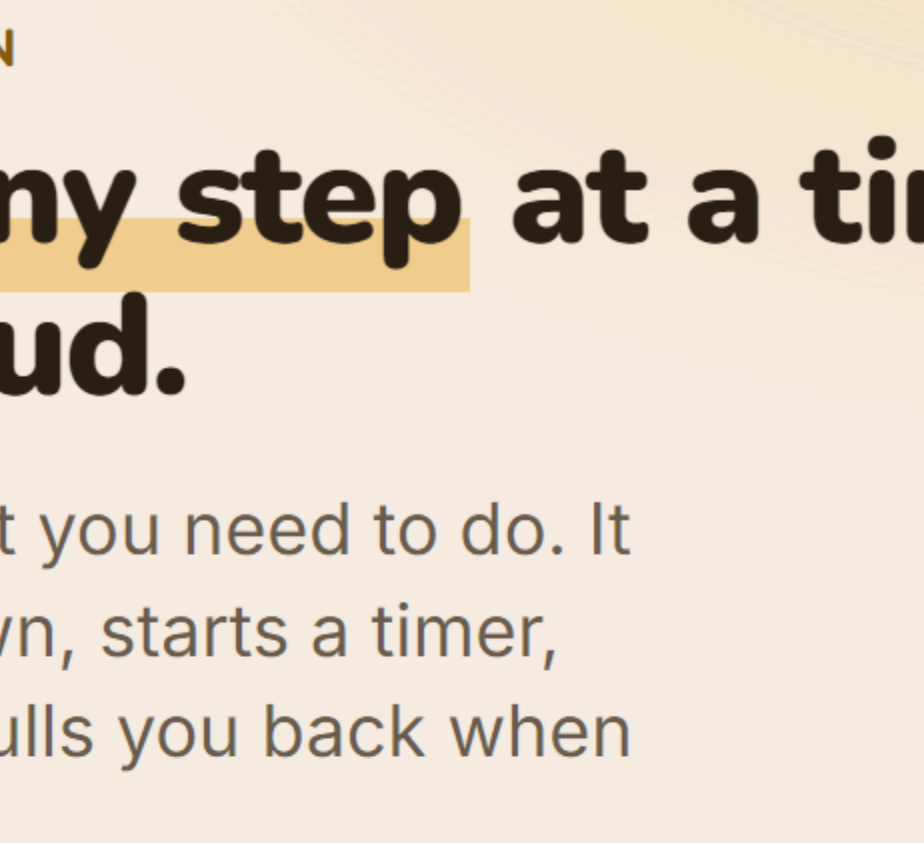

2 **Staying on it**
One notification, a coworker, a noise... and 40 minutes are gone.

3 **Getting back to it**
After a break: "Wait... where was I?"

THE SOLUTION

One tiny step at a time. Out loud.

Tell Nox what you need to do. It breaks it down, starts a timer, and gently pulls you back when you drift.

RESEARCH-BACKED ONBOARDING

5 questions. Under a minute. No forms.

Barkley: help at the moment of action

Safren: break tasks down

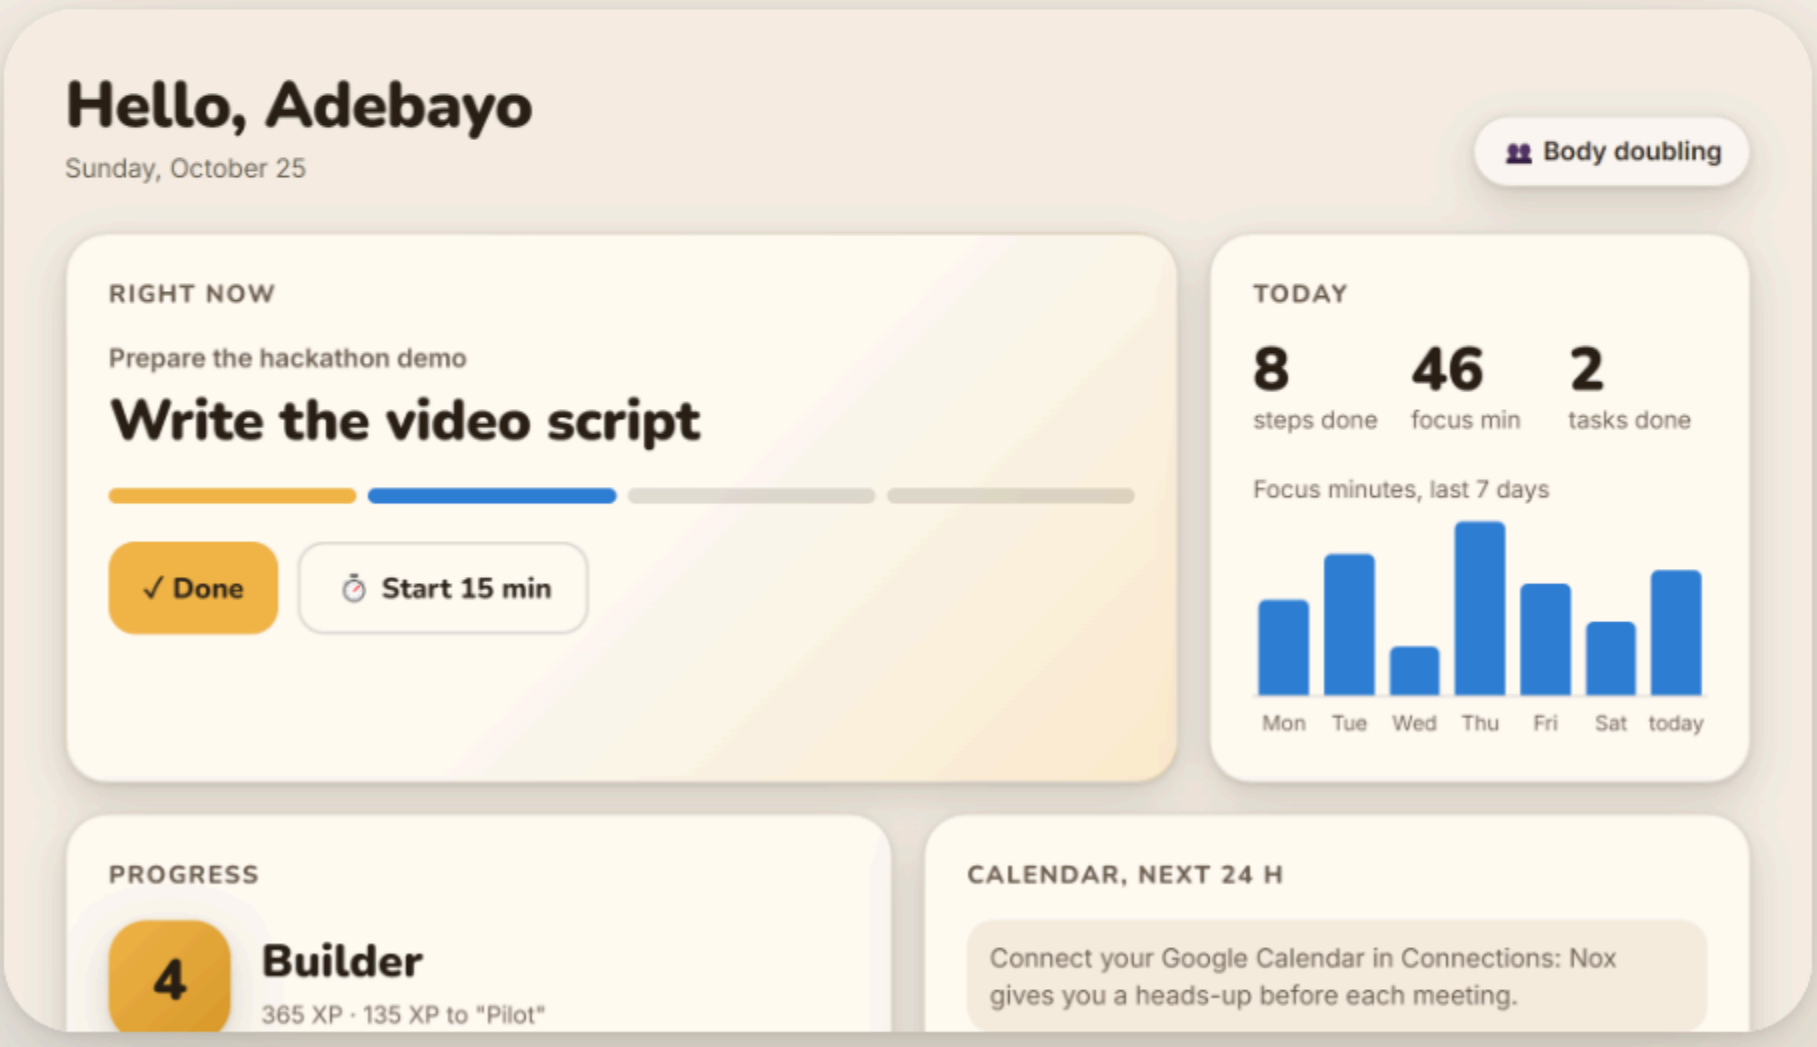

Gollwitzer: "if... then..." plans

PROGRESS & MEMORY

It remembers you. And you see your progress.

Steps checked off, focus minutes, 7 work methods (Pomodoro, body doubling...). Everything stays on your PC, and you can delete it in one click.

UNDER THE HOOD

Real-time voice, powered by the OpenAI Realtime API.

gpt-realtime-2.1 over WebRTC

Hands-free, and you can interrupt it anytime. Tools: tasks, timer, memory.

Calendar, Gmail, Telegram

A heads-up before meetings, important emails read out loud, and nudges on your phone.

Game mode

XP, ranks, skills to unlock. No streak to lose, ever.
